Letter of interest

We at Synopsys would like to show our interest in the Software-Defined Hardware project. Our customers are intensively using UVM for digital verification of chips and FPGAs. Hence teaching UVM to students at DTU is the right path.

We intend to contribute with tool support for this project.

Best Regards

A handwritten signature in purple ink, appearing to read "Patrick R. Haspel", written over a thin vertical line.

Dr. Patrick R. Haspel
University Program Director
